ACRYLIC & PLEXIGLASS

Clear Acrylic

Clear acrylic, often called plexiglass, provides a transparent sheet for display cases, covers and fabricated signs. Include support locations, holes and cutouts when specifying the finished panel.

BEFORE YOU ORDER

Confirm cast or extruded construction, grade, masking and thickness tolerance. 5 × 10 ft appears in an older brochure only; ask about availability.

Catalogue images are visual references, including illustrative images. Confirm exact colour and finish with a sample.

Cutting: Custom sizing available by quote | Construction and grade: Confirm cast or extruded construction, manufacturer and grade with our team.

SIZES, COLOURS & ORDER OPTIONS

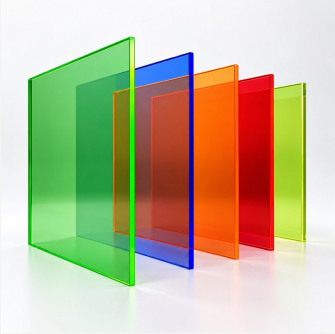

Colour / finish	Sheet size	Thickness choices
Custom	Custom size - send finished dimensions	By quote
Clear	4 × 8 ft	1/8 in, 3/16 in, 1/4 in, 3/8 in, 1/2 in, 1 in

Plan the sheet thickness around the finished dimensions, then include shelf supports, mounting holes or cutouts in your fabrication request.

Coloured Acrylic

Coloured acrylic sheet is used for signs, display panels and decorative accents. Colour, thickness and finish are specified with the quote for the intended design.

BEFORE YOU ORDER

Colour names and colour codes are not specified in the current range. Request the available colour samples before ordering.

Catalogue images are visual references, including illustrative images. Confirm exact colour and finish with a sample.

SIZES, COLOURS & ORDER OPTIONS

Colour / finish	Sheet size	Thickness choices
Confirm colour / finish	4 × 8 ft	1/8 in, 3/16 in, 1/4 in

Choose the sheet thickness and finish around the design, including how light should pass through or reflect off the panel.

Frosted Acrylic

Frosted acrylic has a satin appearance for privacy panels, lighting diffusers and illuminated displays. The listed 4 × 8 ft sheets are 1/8 in or 1/4 in thick.

BEFORE YOU ORDER

Confirm the supplied colour, frosting, light diffusion and surface finish against a sample.

Catalogue images are visual references, including illustrative images. Confirm exact colour and finish with a sample.

SIZES, COLOURS & ORDER OPTIONS

Colour / finish	Sheet size	Thickness choices
Confirm colour / finish	4 × 8 ft	1/4 in, 1/8 in

Plan the size, thickness and placement around your light source, display frame or interior layout.

Satin Non-Glare Acrylic

Satin non-glare acrylic is used for picture framing, display graphics and presentation panels where reflections affect the view. Listed 4 × 8 ft sheets come in 1/8 in and 1/4 in thicknesses.

BEFORE YOU ORDER

Confirm colour, surface finish and viewing performance against a sample.

Catalogue images are visual references, including illustrative images. Confirm exact colour and finish with a sample.

SIZES, COLOURS & ORDER OPTIONS

Colour / finish	Sheet size	Thickness choices
Confirm colour / finish	4 × 8 ft	1/4 in, 1/8 in

Choose the sheet size around the frame or display, and consider the viewing distance and lighting in the finished space.

Acrylic Mirror

Acrylic mirror sheet has a reflective face for display lettering, decorative panels and event signs. Plan the mounting surface and finished shape around the selected sheet thickness.

BEFORE YOU ORDER

Confirm mirror tint and backing; these options do not name a colour. Coloured mirrors are listed separately.

Catalogue images are visual references, including illustrative images. Confirm exact colour and finish with a sample.

SIZES, COLOURS & ORDER OPTIONS

Colour / finish	Sheet size	Thickness choices
Confirm colour / finish	4 × 8 ft	1/8 in, 1/4 in

Plan the overall layout, mounting surface and panel sizes before ordering pieces for a larger installation.
