CUSTOM HDPE PUCKBOARD

Your conduit layout. Cut into puckboard.

Custom flat plates with holes help organise a planned conduit array. Supply Kings makes these spacers from puckboard, with the drawing and quantity used to prepare your quote.

Custom sizes. Project pricing.

Specify the complete layout. Supply Kings reviews the requirements and confirms feasibility, the supplied specification, price and timing.

Illustrative project planning image. It does not establish supplied dimensions or an installation specification.

Choose the hole layout

Uniform-hole layout

Repeat one hole diameter for a group of matching conduits. Specify the actual outside diameter and required hole clearance.

Mixed-diameter layout

Use a labelled hole schedule where more than one conduit size is required. Locate each hole from the same drawing datum.

Project examples

Electrical conduit arrays. A repeated plate pattern for a planned multi-conduit duct bank.

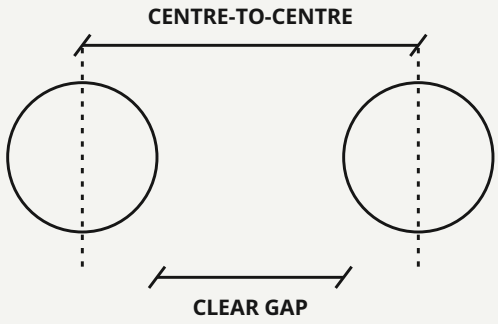

Communications runs. A grouped layout with the specified number of smaller conduits.

Mixed-size projects. Different hole sizes arranged to the project conduit schedule.

Prepare a drawing we can quote.

The plate is custom. These details define what is being cut and help avoid ambiguity before production.

Specify which spacing you mean.

Centre-to-centre measures between conduit axes. Clear gap measures between the outside surfaces. Hole clearance is a separate dimension.

Concept diagram only - not to scale. Circles represent conduit outside surfaces.

01 Conduits & openings

Actual conduit outside diameters; required hole diameters or clearance; count of each hole size.

02 Plate geometry

Outline dimensions, thickness, hole centres, edge distances, drawing units and required tolerances.

03 Order details

Quantity per design, intended use, delivery location and required date.

04 Project requirements

Approved conduit separation, support and installation details; any required material documentation or approvals.

Review. Confirm. Then order.

Supply Kings reviews the drawing and confirms feasibility, the supplied specification, price and timing. Check the quoted drawing and conduit fit before the main assembly.
